PROFESSIONAL SUMMARY

Founder and commercial operator based in Cape Town, running Zar Media Group — a software business selling B2B SaaS to local and international clients in the compliance, accounting, and financial services sectors. Comfortable owning the full sales cycle: prospecting, high-level discovery meetings, product demonstrations, negotiation, and close — with the technical depth to speak credibly to both commercial stakeholders and engineering teams.

A product engineer as well as a seller — Product Engineer, Governance Portal & Design System at Integrity Architecture, owning enterprise portal UI/UX and design-system-driven frontend delivery. Proven operator beyond the deal: has shipped dozens of client projects end-to-end, run marketing with weekly ad creative production, and built secure Azure cloud infrastructure to automate business processes. Analyst roles at SA Bullion and O'Brien Financial add direct exposure to client-facing reporting and regulated financial environments. Completing a BCom in Information and Technology Management at MANCOSA.

EXPERIENCE

Founder

Feb 2025 – Present

Zar Media Group · Cape Town

B2B SAAS · FINTECH · COMPLIANCE & PROFESSIONAL SERVICES

- Sold B2B SaaS internationally and locally — representing the company in high-level sales meetings and owning discovery, product demonstrations, and negotiation through to close
- Developed and commercialised independent software products for the compliance, accounting, and financial sectors, taking each from concept through to paying clients
- Shipped dozens of client projects end-to-end while managing client expectations, scope, and delivery timelines from kickoff to handover
- Ran the marketing function, producing weekly ad creatives that sustained audience engagement and fed the sales pipeline
- Provisioned and administered Azure virtual private servers to automate core business processes, architecting fully secure cloud environments that mitigate sensitive-document leakage risk for clients in regulated industries
- Delivered a doctor-led medical negligence claim assessment platform (Medical Malpractice Claims) — a free case review intake funnel built for a sensitive, high-consideration enquiry across private and public sector matters

Product Engineer · Governance Portal & Design System

2026 – Present

Integrity Architecture (Pty) Ltd · Cape Town

REGTECH · AUDIT INFRASTRUCTURE · ENTERPRISE PRODUCT

- Named on the company's leadership and delivery team as Product Engineer, owning the portal surfaces operators work in day to day
- Build enterprise portal UI and UX for governance workflows — consent capture, evidence intake, audit trails, and release gating — as accessible, responsive workflow design across devices
- Own the design system driving frontend delivery, and work the product end-to-end with the commercial side — shaping scope from client discovery through to demonstrating the platform to enterprise prospects

Analyst

Nov 2025 – Present

SA Bullion · Cape Town, On-site

PRECIOUS METALS · COMMODITY TRADING · FINANCIAL ANALYTICS

- Produce structured reporting on precious metals inventory positions — tracking stock levels, movements, and discrepancies within South Africa's leading gold and bullion trading firm
- Validate and reconcile commodity datasets using advanced Excel (pivot tables, macros, VLOOKUP/INDEX-MATCH) to ensure reporting accuracy and decision-grade data quality
- Deliver management-ready dashboards and visualisations supporting inventory planning, operational reconciliation, and senior-level review cycles

Data Analyst

Jun 2025 – Nov 2025

O'Brien Financial · Cape Town, On-site

FINANCIAL SERVICES · SHORT-TERM INSURANCE · REGULATED ENVIRONMENT

- Delivered financial data analysis within a regulated short-term insurance and financial services environment — maintaining data accuracy and regulatory compliance throughout
- Extracted, cleaned, and modelled client financial datasets in Excel; built Power BI visualisations used by senior advisors in client settlement discussions
- Managed client financial cases from data intake through to resolved claim outcomes, ensuring auditability and data integrity at each stage

Full Stack Developer

Sep 2024 – Jun 2025

LC Studio · Western Cape, Internship

TECHNOLOGY · DATA ENGINEERING · AGILE/SCRUM

- Built data extraction pipelines, logistics analytics platforms, and operational reporting systems in an Agile/Scrum product team
- Developed structured data tools — inventory tracking, supply-chain management systems — using TypeScript, Python, SQL, and Node.js
- Delivered live monitoring platforms and reporting tooling across sprint cycles

COMMERCIAL & TECHNICAL SKILLS

SALES & COMMERCIAL

B2B SaaS Sales · Consultative Selling · Discovery & Product Demos · Negotiation & Closing · Client Relationship Management

PRODUCT & FRONTEND ENGINEERING

React & Next.js · TypeScript · Design Systems · UI/UX & Accessibility · Responsive Workflow Design

PRODUCT DEVELOPMENT

Discovery & Requirements · Scope & Roadmap · Prototyping · Release & Iteration

MARKETING & GROWTH

Ad Creative Production · Campaign Management · Audience Engagement · Lead Generation

DATA & INFRASTRUCTURE

Azure Cloud Infrastructure · Python · SQL · Power BI · Advanced Excel

DELIVERY & OPERATIONS

Project Delivery · Client Expectation Management · Compliance & Audit Workflows · Process Automation

EDUCATION

BCom Information and Technology Management

2025 – 2027

MANCOSA

In progress · Information systems, business management & programming

Full Stack Development Certificate

Apr – Sep 2024

Life Choices Academy

Full-stack engineering · Vue.js, Node.js, SQL, Agile/Scrum

National Senior Certificate (Matric)

2019 – 2023

Claremont High School

Pure Mathematics · Physical Science · English HL

ADDITIONAL EXPERIENCE

Surf Coach

Surf Emporium Muizenberg

Apr 2023 – Jul 2025

International client instruction across skill levels; long-term client relationship management through structured service delivery.

Business Owner

The Car Bath

Apr – Dec 2022

Founded and operated a customer-facing business while in secondary school — managing marketing, scheduling, financial oversight, and customer acquisition independently.

Assistant Mechanic

KC Auto Kenilworth

Jan – Aug 2021

Supported daily workshop operations; developed process-oriented, detail-focused work ethic.
